SUMMARY

Motivated Computer Science and Engineering student specializing in AI, transitioning into Backend Development. Possesses strong foundational knowledge in server-side architecture, database management, and API design. Proven ability to build secure, modular full-stack web applications utilizing Node.js, Express, and MVC patterns.

TECHNICAL SKILLS

Backend Dev:	Node.js, Express.js, RESTful APIs, MVC Architecture
Databases & Auth:	MongoDB, Mongoose ODM, JWT Authentication, Bcrypt (Password Hashing)
Frontend Dev:	HTML5, CSS3, JavaScript (ES6+), Bootstrap
Languages:	Python, Java, C, C++, SQL (Learning)
Tools & Platforms:	Git, GitHub, VS Code, Postman, Jupyter Notebook

PROJECTS

Plant Analysis Tool

Node.js, Express, MongoDB, JWT, Gemini API

- Architected a secure backend service utilizing the MVC pattern to cleanly separate business logic from routing.
- Integrated the Gemini API to handle image and text-based plant diagnostics and deliver automated analytical reports.
- Implemented secure user access controls using JWT Authentication and securely hashed passwords using Bcrypt.

Blog Web Application

Node.js, Express, MongoDB, Mongoose

- Engineered a full CRUD (Create, Read, Update, Delete) application permitting authenticated users to manage blog posts.
- Designed data schemas using Mongoose ODM to enforce strict type checking and validation for user and post datasets.
- Configured global error handling middleware to capture operational failures gracefully without crashing the server.

Company Website & Contact Engine

HTML5, CSS3, JavaScript, Node.js, MongoDB

- Developed a fully responsive client-facing company website optimized for multi-device performance layouts.
- Built a custom backend lead-capture pipeline connecting frontend contact forms directly to a MongoDB database instance.

EDUCATION

B.Tech in Computer Science and Engineering (Artificial Intelligence)

Expected Graduation: 2027

DY Patil College of Engineering and Technology, Kolhapur | 2nd Year

CBSE Class 10th

2020

Chhatrapati Shahu Vidyalaya, Kolhapur

EXPERIENCE & HACKATHONS

Virtual AI Intern — Eduskills

- Explored fundamental AI architectures and gained hands-on exposure working with neural networks and datasets.

Finalist — Smart India Hackathon (SIH)

- Collaborated within a fast-paced development sprint team to contribute to a native Android application using Java.

Volunteer — Google Developer Student Club (GDSC)

- Engaged with campus tech communities to organize workshops, hackathons, and local coding initiatives.

ADDITIONAL INFORMATION

Achievements: Ranked in top 5% of class; recognized for innovative project applications at the college expo.

Core Strengths: Clean Code Architecture, Quick Learner, Systems Thinking, Collaborative Problem Solving.

Languages: English, Marathi, Hindi.
